**FOR IMMEDIATE RELEASE**

**EMC AND ITS DOCUMENTUM AND LEGATO DIVISIONS NAMED TO KMWorld MAGAZINE'S LIST OF "100 COMPANIES THAT MATTER"**

**Hopkinton, MA, March 25, 2004** - EMC Corporation and its Documentum and LEGATO software divisions have been named to KMWorld Magazine's list of 100 Companies that Matter in Knowledge Management for 2004. The KMWorld Magazine 100 identifies innovative organizations that are helping create, redefine or enhance a market in the knowledge economy. KMWorld's acknowledgement of EMC and its software divisions highlights EMC's significant presence in the information management market. EMC is redefining how organizations manage their business knowledge. Through its information lifecycle management (ILM) leadership, EMC is helping organizations maximize the value of their information at the lowest total cost at every point in the information life cycle.

"We're honored that KMWorld has recognized the innovative technology leadership and combined muscle of EMC, Documentum and LEGATO software," said Howard Elias, EMC's Executive Vice President of Corporate Marketing and New Ventures. "ILM is bringing about a major shift in the way organizations manage their information assets and technology investments. EMC is committed to helping organizations recognize the power of ILM for harnessing enterprise content and tackling the knowledge management challenges associated with information growth, regulatory compliance, business continuity and cost containment."

"As in previous years, the '100 Companies that Matter' list was conceived as a way to identify some of the organizations leading the way in the knowledge economy," said Hugh McKellar, KMWorld's Editor-in-Chief. "Each of the '100 Companies that Matter' has either helped to create a market, redefine one or enhance one, and they all share one thing — velocity of innovation."

**About EMC**

EMC Corporation (NYSE: EMC) is the world leader in products, services and solutions for information storage and management that help organizations extract the maximum value from their information, at the lowest total cost, across every point in the information lifecycle.
