

Windows NT®

# Adobe® Acrobat® Capture® 3.0

Bring your **paper** documents  
to life on the **Web!**

**Optimize your paper-based information!** Adobe Acrobat Capture software teams with your scanner to let you convert paper documents to fully searchable Adobe Portable Document Format (PDF) files. With Acrobat Capture, you can preserve the exact look and feel of any paper document—from business contracts and technical manuals to full color, visually rich marketing materials—in compact Adobe PDF files that can be viewed by anyone with the free Acrobat Reader™ software. Post your files to the Web, an extranet, or an intranet, and they're instantly available to customers, partners, and colleagues around the globe! Adobe PDF files can also be easily distributed via e-mail, CD-ROM, file servers, and most document management systems.

#### **MAKE PAPER ACCESSIBLE ON THE WEB**

Rather than storing strategic business information in file cabinets where it's difficult to find and use, put all your paper-based information to work for you online. With Adobe Acrobat Capture software, you can batch-process volumes of paper at a time.\* Then, convert your scanned paper to Adobe PDF or high-fidelity HTML, and post those files to the Web or your intranet. By automatically creating intradocument links—including tables of contents, cross references, and indexes—Acrobat Capture makes all your information quickly and easily accessible.

#### **ENSURE DOCUMENT FIDELITY**

When you convert your scanned paper to Adobe PDF, you get electronic files that exactly represent the look and feel of the original paper documents. Acrobat Capture software offers accurate OCR, plus font and page recognition, ensuring that what you have on paper—including images, handwritten notes, and signatures—is what you see on-screen. For organizations that produce multilingual and highly specialized documents, Acrobat Capture offers foreign language dictionaries as well as legal, scientific, medical, and user-defined dictionaries. You can even define customized font sets for improved OCR and font mapping.

#### **WORK PRODUCTIVELY WITH INTUITIVE TOOLS**

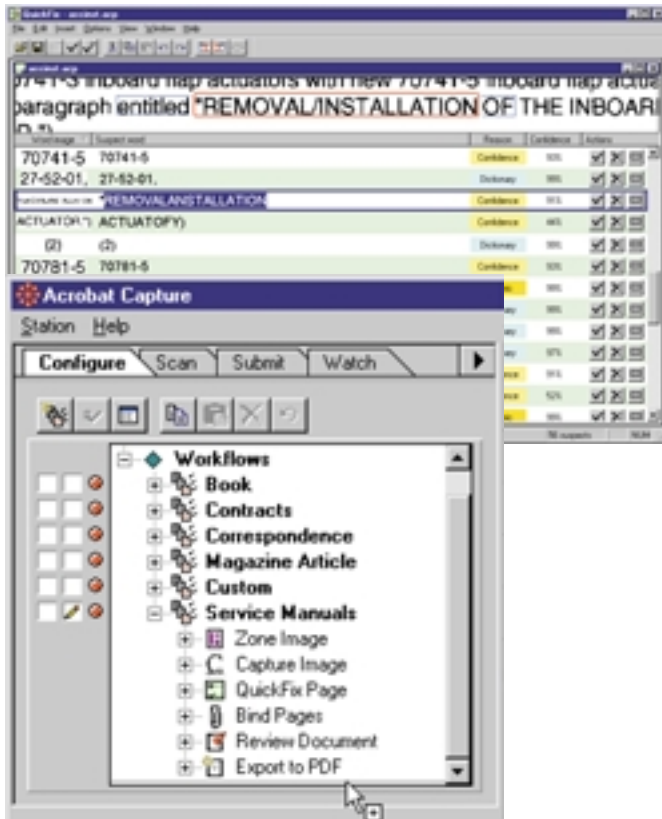

Acrobat Capture lets you create reusable document-processing workflows tailored to different types of conversion projects. Easily assemble customized workflows for forms, magazine articles, and reference manuals—just drag and drop icons that represent conversion actions. While your documents scan, job-action icons appear on-screen so you can track processing status. The new Zone tool lets you define areas of scanned pages to be treated as images, text, or even keywords, and the new QuickFix tool facilitates efficient correction of suspect OCR text.

The ideal publishing solution for any organization looking to better manage its important paper documents, Adobe Acrobat Capture software offers advanced paper-to-Web capabilities that streamline your workflow and maximize the value of your information assets.

\*Acrobat Capture 3.0 is available in two editions. The Personal Edition allows the conversion of as many as 20,000 searchable Adobe PDF pages. Additional 20,000 and 100,000 page packs are sold separately. The Cluster Edition provides the same professional production features as the Personal Edition but is scalable for high-volume requirements and converts an unlimited number of pages. For more information on either edition, contact Adobe or your Adobe reseller. Or visit [www.adobe.com/products/acrobat/capture.html](http://www.adobe.com/products/acrobat/capture.html).

# Let Adobe Acrobat Capture streamline your paper-to-Web workflow!

## DESIGN CUSTOMIZED WORKFLOWS

Drag and drop to assemble reusable document-processing workflows, each tailored for a different type of conversion project.

## SYSTEM REQUIREMENTS

- Pentium® or faster Intel® processor
- Windows NT 4.0 or later operating system with Service Pack 3 or later
- Display card with 1,024x768 resolution
- 64 MB of available RAM (128 MB recommended)
- 86 MB of available hard-disk space (127 MB recommended)
- CD-ROM drive
- PostScript® language printer (recommended)
- Parallel port (Personal Edition only)

## PERFORM FAST FIXES

OCR corrections are a breeze with the powerful QuickFix tool, which highlights suspect words for easy correction.

## ZONE IN ON SEARCH ELEMENTS

Define areas of scanned pages to be treated as text, images, or even keywords with the Zone tool.

## CREATE LOGICAL LINKS

Let Acrobat Capture automatically generate tables of contents, cross-references, indexes, and other helpful intradocument links.
